

Ideation Phase Define the Problem Statements

Team ID	SWTID-2026-1448
Project Name	Import Data using Transform Maps (Spreadsheet)

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Customer Problem Statement for this project (PS-1):

I am	A ServiceNow administrator who receives bulk employee data (Employee ID, Name, Email, Department, Location) in an Excel spreadsheet.
I'm trying to	Import that data into the ServiceNow platform quickly and accurately, and keep it up to date when new spreadsheets arrive.
But	Typing records one by one is slow, and importing the same or updated file again creates duplicate or incorrect records.
Because	There is no staging area, field mapping or unique-key check (Coalesce) to validate data before it reaches the target table.
Which makes me feel	Frustrated, stressed about data accuracy, and unsure whether the records in ServiceNow can be trusted.

Statement Table:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	ServiceNow Administrator	Import bulk employee data from an Excel spreadsheet into ServiceNow accurately	Manual entry is slow, and reimporting the same file creates duplicate records	There is no staging, field mapping or unique-key (Coalesce) check	Frustrated and worried about data accuracy
PS-2	HR Manager / Reporting Analyst	See how many employees are in each department and location	The data is scattered across spreadsheets and there is no quick, reliable view	Employee records are not centralised in ServiceNow with reports or a dashboard	Uninformed and unable to decide with confidence
