

Project Design Phase-II

Data Flow Diagram & User Stories

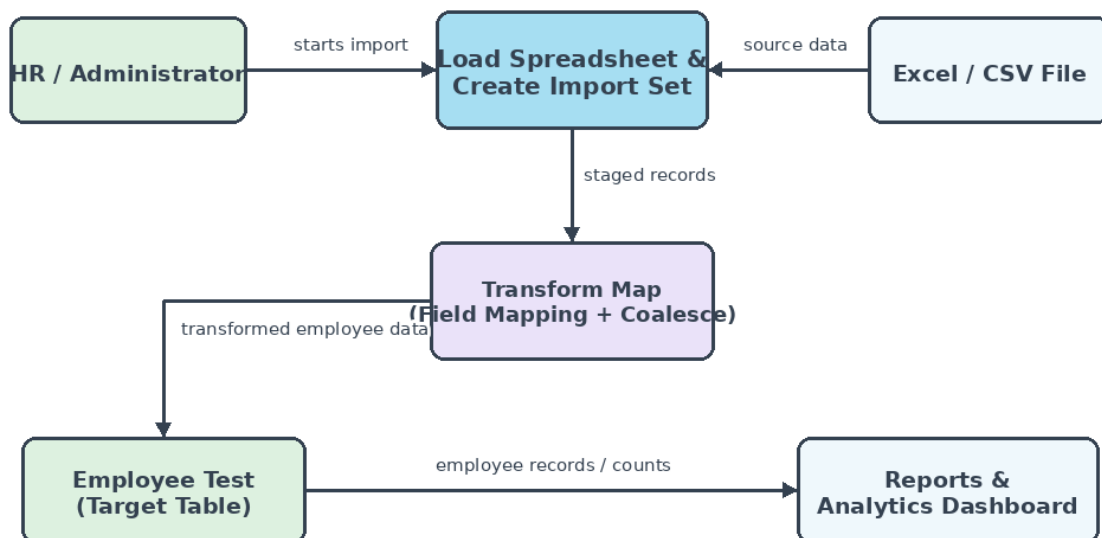

Team ID	SWTID-2026-1448
Project Name	Import Data using Transform Maps (Spreadsheet)

Data Flow Diagrams:

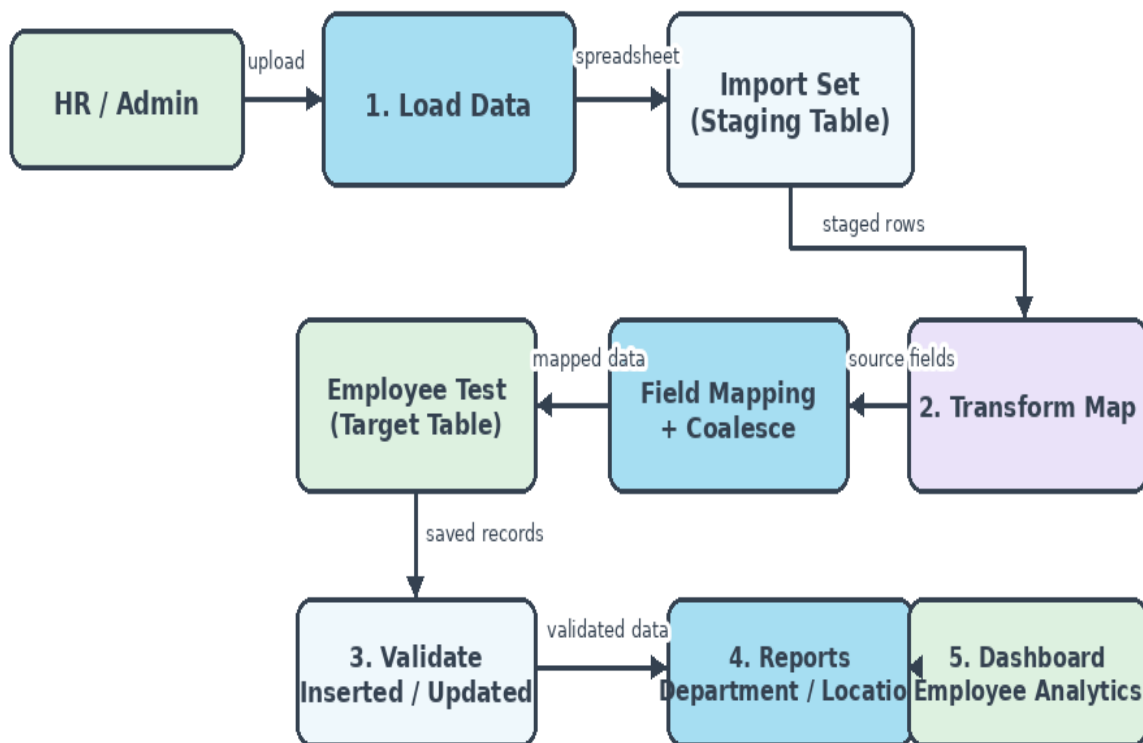

A Data Flow Diagram (DFD) visually represents how information moves through a system. In this project, it shows how employee data is uploaded from a spreadsheet, staged in a ServiceNow Import Set, processed through a Transform Map, stored in the Employee Test table, and displayed in reports and dashboards.

DFD Level 0 (Simplified)

DFD Level 0 - Employee Data Import System

DFD Level 1 - Spreadsheet Import Workflow

Data flow summary

1. HR/Admin selects an Excel spreadsheet and loads it into a ServiceNow Import Set.
2. The Transform Map matches source columns to Employee Test fields.
3. Coalesce uses Employee ID to update existing records and avoid duplicates.
4. The transformed employee records are checked in the target table.
5. Reports and the dashboard summarize employee records by department and location.

User Stories

The following user stories describe the requirements for the ServiceNow employee data import project.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
HR / Administrator	Spreadsheet Upload	USN-1	As an HR user, I can upload an Excel file with employee details.	The file loads into the Employee Import staging table.	High	Sprint-1
	Import Set	USN-2	As an administrator, I can review uploaded rows in the Import Set.	The import set is created and rows are available for transformation.	High	Sprint-1
	Field Mapping	USN-3	As an administrator, I can map spreadsheet columns to Employee Test fields.	Required source and target fields are mapped and saved.	High	Sprint-1
	Data Transformation	USN-4	As an administrator, I can run the Transform Map to import employee data.	Valid employee records appear in Employee Test.	High	Sprint-1
	Duplicate Prevention	USN-5	As an administrator, I can use Employee ID as the coalesce field.	Existing IDs are updated instead of duplicated.	High	Sprint-2
HR / Web user	Employee Records	USN-6	As an authorized user, I can view imported employee records.	Employee ID, name, email, department, and location are visible.	Medium	Sprint-2
Administrator	Department Report	USN-7	As an administrator, I can view employees grouped by department.	The report displays department-wise employee counts.	Medium	Sprint-2
	Location Report	USN-8	As an administrator, I can view employees grouped by location.	The report displays location-wise employee counts.	Medium	Sprint-2
	Dashboard & Validation	USN-9	As an administrator, I can view reports and check import history.	Dashboard shows reports; history shows inserted, updated, and ignored rows.	Medium	Sprint-2
