

Project Design Phase Problem – Solution Fit Template

Team ID	SWTID-2026-1448
Project Name	Import Data using Transform Maps (Spreadsheet)

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

1. CUSTOMER SEGMENT ServiceNow administrators and IT teams Teams that import employee or other business records from Excel/CSV spreadsheets.	6. CUSTOMER CONSTRAINTS Manual entry takes time and can create errors. Users may have inconsistent column names, missing values, duplicate records, or limited knowledge of field mapping.	5. AVAILABLE SOLUTIONS Manual record entry, spreadsheet editing, and basic import tools. These options may require repeated checking and careful mapping.
2. JOBS-TO-BE-DONE / PROBLEMS Import spreadsheet records into ServiceNow accurately. Reduce repetitive data entry and make the process easier to repeat.	9. PROBLEM ROOT CAUSE Source data and target fields may not match directly. Missing or invalid values, duplicates, and incorrect mappings can cause failed or inaccurate imports.	7. BEHAVIOUR Users prepare a spreadsheet, upload it, map source columns to target fields, run the transform, and check the import results.
3. TRIGGERS A new employee list or business spreadsheet needs to be added or updated in ServiceNow.	10. YOUR SOLUTION Use a ServiceNow Import Set and Transform Map to load spreadsheet data. Map source columns to target fields, validate records, transform valid data, and review import errors and status.	8. CHANNELS OF BEHAVIOUR ServiceNow interface: • Import Set / data source • Transform Map configuration • Import preview and run • Import logs and target table Users access the feature through their authorized ServiceNow account.
4. EMOTIONS: BEFORE / AFTER Before: uncertainty about errors and manual effort. After: clearer results and more confidence in imported records.
